Twisted - Stool
Philip Michael Wolfson

The complex shapes of TWISTED create a choreography of motion and continual transformation, and they reveal Wolfson’s unique approach to design: layering and manipulating the material into fluid shapes and forms, where shadow and reflection are an integral part of the seduction of the work. Manufactured in England, the TWISTED series pushes the material boundaries. Stretching, bending and curving seamless forms, the works appear frozen in space.

Twisted - Stool
Philip Michael Wolfson

Creating a choreography of movement and transformation with a subtle dynamic of a single bending surface, the TWISTED series examines minimal form and material. Using modern and traditional methods the main body is laser cut from a flat pattern, then hand formed and given a 24K gold leaf internal finish.
